# CUSTOM ASSAY SERVICE

Scientists at Bioquochem have decades of experience developing and running biochemical assays.

At this time, when **COVID-19** makes the work of many researchers impossible, we are pleased to offer **custom assay services**.

Simply send us your samples and we will deliver the results.

Choose from over **twenty assay kits**. Protocols for all of these assays are conveniently available at [info@bioquochem.com](mailto:info@bioquochem.com)

And then, if you choose to bring the work back in-house, our assay kits are **commercially available** for your research.

This brochure lists all the available assays, but If you are looking for an assay or do not know what assay(s) are best for your work, our team of **experienced** Ph.D. scientists will be delighted to help you.
