

HARRIS HEMATOXYLIN AND EOSIN STAIN KIT

KH07005-125/500 mL

DESCRIPTION AND USE

Hematoxylin Eosin is a common staining technique used in a wide range of tissues. Through this method, nuclei can be visualized as blue, muscle in red, connective tissue in pink and nucleic acid associated with proteins in purple.

Designed for research use only, it is not approved for human or animal use, or clinical diagnosis. Depending on the sample type, it is possible that times need to be modified. BQC recommends to perform a test first.
